

German Patent DE 297 19 704

Translation of claims

CLAIMS

1. Solid, semi-solid or liquid form of medication, containing naloxone or a pharmacologically acceptable salt of naloxone, characterized in that the form of medication contains at least one stabilizer, which prevents the dimerization of the naloxone, in a quantity of 0.001 to 5 weight %, referred to the total mass of the substance mixture.

2. The form of medication according to claim 1, characterized in that it contains at least one stabilizer in a quantity of from 0.01 to 1 weight %.

3. The form of medication according to claims 1 and 2, characterized in that it contains at least one stabilizer in a quantity of from 0.01 to 0.5 weight %.

4. The form of medication according to claims 1 through 3, characterized in that the stabilizer is selected from the group comprising:

sulfur dioxide, sodium sulfite, sodium bisulfite, ascorbic acid and its derivatives and tocopherol and its water- and fat-soluble derivatives, such as Tocoferolan(R) or tocopherol acetate, sulfites, bisulfites and hydrogen sulfites of alkali metals, alkaline-earth metals and other metals, PHB esters, BHA, BHT, gallates, and low fatty acids, fruit acids, phosphoric acids, sorbic and benzoic acid and their salts, esters, derivatives and isomeric compounds,

ascorbyl palmitate, lecithins, singly and multiply hydroxylated benzene derivatives, ethylenediaminetetraacetic acid and its salts, citraconic acid, cysteine, L-cystine, conidandrins, diethylcarbonates, methylene dioxyphenols, kephalins,  $\beta$ - $\beta$ -dithiopropionic acid, and biphenyl and other phenyl derivatives for preventing the dimerization of naloxone.
